Java Developer – Job Description

Job Title: Java Developer
Experience: 2–4 Years
Location: Pune / Remote
Employment Type: Full-Time

🚀 Role Overview

We are looking for a skilled Java Developer to design, develop, and maintain scalable backend applications. The ideal candidate should have strong experience in Java, Spring Boot, and building RESTful APIs.

🔧 Key Responsibilities

- Develop and maintain backend services using Java and Spring Boot
- Design and implement REST APIs for scalable applications
- Work with databases to design efficient schemas and queries
- Collaborate with frontend and DevOps teams
- Write clean, maintainable, and efficient code
- Debug, troubleshoot, and optimize application performance
- Participate in code reviews and technical discussions

🧠 Required Skills

- Strong proficiency in Java (Java 8 or above)
- Experience with Spring Boot and Microservices architecture
- Knowledge of RESTful API development
- Familiarity with SQL databases (PostgreSQL / MySQL)
- Understanding of Git version control
- Basic knowledge of Docker and cloud platforms (AWS preferred)

⭐ Good to Have

- Experience with message queues (Kafka / RabbitMQ)
- Knowledge of CI/CD pipelines
- Exposure to system design concepts
- Understanding of authentication (JWT, OAuth)

🎓 Qualifications

- Bachelor’s degree in Computer Science or related field

💡 What We Offer

- Opportunity to work on scalable systems
- Collaborative and growth-oriented environment
- Flexible work setup

📩 How to Apply

Share your resume and portfolio/projects for consideration.

If you want, I can also:

- Generate **sample resumes** to test your AI matching
- Create **multiple JDs (junior, senior, backend, full stack)**
- Or tailor this JD specifically for your **AI demo scoring system**
