MILIND DESHMUKH

Senior Solution Architect & Technology Leader

Professional Summary

I am a Senior Solution Architect and Technology Leader with over 21 years of experience delivering enterprise-scale, cloud-native solutions across Banking, Fintech, Insurance, Education, Logistics, and SaaS platforms. My core strength lies in bridging business and technology by translating complex requirements into scalable, secure, and cost-effective architectures.	I bring extensive international experience, having worked across the USA, UK, Belgium, and Finland, collaborating with global clients and cross-functional teams. I am comfortable engaging with C-level stakeholders, product owners, and engineering teams to align technology initiatives with business objectives.

Core Competencies & Technology

☁️ Cloud & Architecture	AWS & Azure architecture design. Microservices, serverless, and event-driven systems. Legacy to Cloud-native modernization. Cost optimization
🤖 AI & GenAI Integration	GenAI-powered systems and LLM-based workflows. Retrieval-Augmented Generation (RAG) architectures. Agentic AI frameworks.
⚙️ DevOps & Infrastructure	Containerization (Docker) and Orchestration (Kubernetes, EKS, AKS). CI/CD pipelines (Jenkins, Azure DevOps). Blue-Green & Canary releases.
💻 Full-Stack Engineering	Backend: Java, Spring Boot, Node.js, Python. Frontend: Angular, React. Databases: Oracle, PostgreSQL, MongoDB, DynamoDB, CosmosDB.
🔐 Security & Governance	OWASP-compliant architecture. SSO, MFA, OAuth2, and RBAC implementations. Secure API design and data protection.SOC-2

End-to-End Execution Capability

I bring complete ownership mindset across the entire software delivery lifecycle:

Phase 1 Strategy & Design	Phase 2 Build & Deploy	Phase 3 Scale & Innovate
• Business Analysis • Solution Strategy • Technology Selection • Platform Design ,RoadMap planing	• Development • Engineering Execution • Cloud Infrastructure • DevOps Setup	• Performance Optimization • Advanced Strategies • AI/GenAI Integration • Continuous Innovation

What I Deliver

I partner with organizations to solve complex challenges through strategic architecture:

🎯 Strategize	Define technology roadmaps and architecture strategies aligned with business goals.
🔄 Modernize	Transform legacy systems into scalable, cloud-native platforms.
🏗️ Build	Design secure enterprise architectures and scalable SaaS products.
🤖 Innovate	Implement AI/GenAI-driven solutions to augment business processes.
📊 Optimize & Execute	Optimize cost, performance, and reliability while leading end-to-end delivery. ROI focused optimization.

Domain Expertise & Flagship Projects

Industry Domain	Key Implementations	Notable Clients
🏦 Banking & Finance	• Fraud detection frameworks • High-volume transactions • Payment gateway integration • Credit Card Processing, •Investment analytics	• AmEx • Charles Schwab • Axis Bank Standard Chartered
🛡️ Insurance	• Policy lifecycle management • AI driven claims adjudication • Surety systems • Rule Engine	• Marsh & McLennan • PFA Surety
🛍️ E-Commerce & Retail	• Enterprise e-commerce systems • Omnichannel OMS • High-availability systems • Real time inventory	• Lowe's • GM • Ford • Telus
📦 Logistics & SCM	• Real-time tracking • Warehouse management • Stock visibility • SCM modernization	• Matson • ExxonMobil(Complete Product development)
💼 Payroll & HR Systems	• End-to-end payroll & HR platform • Employee onboarding & lifecycle management • Attendance & time tracking • Leave management • Payroll processing engine • SSO & • Multi-tenant SaaS architecture • Employee of Record (EOR) - Europe & UK	Global - Europe & UK focus(Complete Product development)
🎓 E-Learning & Education	Financial Assessment • E learning platform for corporate and universities • SCORM based content	• College Board • Netex SaaS (Complete Product development)
